Huion Kamvas Pro 27 GT2701 graphics tablet

The Huion Kamvas Pro 27 is a flagship 4K UHD graphics tablet that combines studio precision with exceptional comfort. The 27-inch IPS display with a resolution of 3840 × 2160 and brightness of 300 nits offers impressive image sharpness and detail. Wide 178° viewing angles and a 1000:1 contrast ratio make every project look clear regardless of perspective. Thanks to the new Canvas Glass with AG Etched Glass matte finish and full lamination, drawing on the screen resembles natural contact with paper, and reduced glare increases comfort even when working for hours.

Color accuracy and 3D LUT calibration

The Kamvas Pro 27 display covers 99% of sRGB, 98% of Adobe RGB and 97% of DCI-P3, ensuring excellent color fidelity in any project. More than 1.07 billion hues and hardware 3D LUT calibration ($\Delta E1.5$) ensure studio-quality color accuracy right out of the box. Each unit is factory calibrated and comes with a calibration report, making the screen ready for illustration, animation, graphic design

or video post-production.

PenTech 4.0 pen technology

The Kamvas Pro 27 uses Huion's latest PenTech 4.0 technology, which offers up to 16,384 pressure levels, $\pm 60^\circ$ tilt support and an initial activation force of 2g. The kit includes two battery-free pens - the PW600 and PW600S - which differ in shape and weight to suit individual user preferences. The optimized 0.35mm tip stroke and Tilt Auto-Alignment function guarantee full control over every stroke. It also comes with a set of standard and felt tips for your preferred level of friction.

New Generation Canvas Glass

The screen surface is covered with 2nd Generation Low Sparkle Anti-Glare Etched Glass, which eliminates reflections and gives the surface a subtle paper-like texture. Full Lamination technology connects the LCD layer to the touch panel, reducing the parallax effect, while the Anti-Sparkle coating maintains the image with high clarity. With 7H hardness, the screen is scratch-resistant and ready for intensive work in the graphics studio.

Touch and keyboard - you decide

The Kamvas Pro 27 supports 10-point touch (multi-touch), enabling intuitive gestures to zoom, rotate and pan the image. Users can also use Bluetooth keyboards or single-row shortcut panels to streamline their workflow and keep their workstation organized. The macOS version is currently being tested as part of the Beta program.

Ergonomic design

With its slim aluminum chassis, sturdy backrest and thoughtful port layout on top, the Kamvas Pro 27 is both elegant and functional. A built-in handle makes it easy to carry, and compatibility with the 75x75 mm VESA mount allows for mounting on an adjustable arm or stand. Dedicated accessories such as Bluetooth Keyboard, Keyboard Holder, VESA Stand and Desktop Arm are also available.

Wide compatibility

The device works with Windows 10+, macOS 10.12+, Android 6.0+ and Linux (Ubuntu 20.04 LTS). Kamvas Pro 27 supports the most popular graphics programs - including Photoshop, Illustrator, Lightroom, Blender, After Effects, Clip Studio Paint, Krita or MediBang - with full customization of shortcuts and pressure sensitivity in Huion drivers.

Included

- Huion Kamvas Pro 27 graphics tablet
- PW600 standard pen
- PW600S slim pen
- Standard tip (5 pieces)
- Felt tip (5 pieces)
- Pen holder
- HDMI cable
- DP cable
- USB-C ↔ USB-C cable (full-function)
- USB-A ↔ USB-C cable
- DC power adapter
- Documentation and factory calibration report

Manufacturer	Huion
Model	GT2701 (Kamvas Pro 27)
Color	Black
Diagonal of the screen	27 inches
Resolution	3840 × 2160 (UHD 16:9)
Panel type	IPS
Working area	596.7 × 335.7 mm
Contrast ratio	1000:1
Brightness	300 nits (max)
Response time	14 ms

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice.
