Huion Slate 11 graphics tablet

Huion Kamvas Slate 11 is a mobile graphics tablet that combines the functionality of a professional tool with the convenience of a lightweight device. With a 10.95-inch screen and a thickness of just 7.5 mm, the equipment is extremely handy and easy to transport, weighing only 500 g. The aluminum casing provides a sleek look and sturdiness, while the anti-glare screen coating ensures comfortable working even in bright light. It's ideal for creating on the go, learning drawing and everyday creative work.

Screen like paper, image like life

The IPS display with a resolution of 1920 × 1200 px and a refresh rate of 90 Hz provides exceptional smoothness and high color accuracy in 99% of the sRGB gamut. The nano-etched soft light technology used gives the screen a subtle paper-like texture that eliminates glare and reduces eye fatigue. Full lamination and a fingerprint-resistant coating guarantee a clean, clear image and the natural feel of drawing on a real piece of paper.

Computing power for creators

The tablet is equipped with an octa-core MediaTek Helio G99 processor and 8 GB of RAM, which translates into smooth graphics applications and lag-free multitasking. Built-in 128GB memory, expandable by an additional 1TB (microSD), allows you to safely store projects, notes and multimedia. The Kamvas Slate 11 runs on Android 14, supports split-screen and works with apps from Google Play, so you can create right out of the box.

The precision of the H-Pencil stylus

The included H-Pencil stylus with active capacitive technology offers up to 4096 levels of pressure and 60-degree tilt recognition. It provides excellent precision, fluidity and a natural writing or drawing experience - almost like writing on paper. The metal construction and light weight of the pen reduce hand fatigue, and a programmable button allows you to assign functions such as eraser, undo or brush change, significantly increasing productivity.

Energy for the day

A capacious 8000 mAh battery provides up to 11 hours of uninterrupted work or entertainment. Thanks to the fast-charging feature, a full charge takes only 2.7 hours. Kamvas Slate 11 is the hardware that keeps up with your rhythm - from the first sketch to the final presentation of your project.

Sound and image at their best

Four speakers arranged symmetrically on both sides of the tablet create surround stereo sound for an exceptional experience when watching movies, listening to music or playing games. On the front is an 8 MP camera, ideal for video conferencing, and on the back is a 13 MP camera, perfect for taking photos or using tools such as Insert Picture in HiPaint.

Included
