

Mini PC GEEKOM A7 AMD Ryzen 5 7535HS 16GB 512GB + Win 11 Pro

Model: GMA7R57535HS-16512-E

Manufacturer: GEEKOM

EAN: 5905156101890

Product Code: 303608

R13,892

GEEKOM A7 Mini PC with AMD Ryzen™ 5 7535HS, 16GB RAM, 512GB SSD + Windows 11 Pro

The GEEKOM A7 2026 Edition is a powerful mini PC that's perfect for office work, multimedia applications, and everyday use. The computer is equipped with an AMD Ryzen™ 5 7535HS processor, 16 GB of DDR5 RAM, and a fast 512 GB PCIe 4.0 NVMe SSD, ensuring smooth system performance, fast application launch times, and comfortable multitasking. The device comes with Windows 11 Pro pre-installed, so it's ready to go right out of the box.

AMD Ryzen™ 5 7535HS Processor

At the heart of the computer is the 6-core, 12-thread AMD Ryzen™ 5 7535HS processor, which reaches a clock speed of up to 4.55 GHz. The chip is based on the energy-efficient Zen 3+ architecture and offers an excellent balance between high performance and low power consumption. As a result, the GEEKOM A7 handles spreadsheets, multi-tab browsing, video conferencing, document editing, and everyday entertainment with ease.

Integrated AMD Radeon™ 660M Graphics

Graphics processing is handled by the integrated AMD Radeon™ 660M chip based on the RDNA™ 2 architecture. The GPU features 6 graphics cores operating at up to 1900 MHz, ensuring smooth 4K playback, comfortable photo editing, and the ability to run many popular games. This is a powerful solution that eliminates the need for a dedicated graphics card in most everyday applications.

DDR5 Memory and a Fast PCIe 4.0 Drive

The computer in this configuration offers 16 GB of DDR5 memory and a 512 GB M.2 2280 PCIe 4.0 x4 NVMe SSD. This combination ensures high bandwidth and very fast data access, which translates to shorter system and application boot times and more efficient work with large files. The GEEKOM A7 also supports RAM expansion up to 64 GB, providing greater flexibility for the future.

Performance ready for demanding tasks

The modern hardware platform allows you to comfortably handle more advanced tasks, such as editing 4K content, complex creative projects, or intensive multitasking. The fast PCIe 4.0 interface enables very high data read and write speeds, which will be particularly appreciated by users working with large projects and extensive file libraries.

Support for multiple monitors and 8K resolution

With two HDMI 2.0 ports, a USB4 connector, and a USB-C port, the computer can support multiple monitors simultaneously, significantly enhancing workflow convenience. This configuration allows you to create a comprehensive workstation for office work, design, data analysis, or home entertainment. The ability to connect a very high-resolution display ensures a detailed and crisp image.

Extensive Port Selection

The GEEKOM A7 offers a wide range of ports that make it easy to connect accessories and external devices. The front panel features two USB 3.2 Gen 2 Type-A ports, an SD card reader, a 3.5mm audio jack, and a power button. The rear panel features USB4, USB 3.2 Gen 2 Type-A, USB 3.2 Gen 2 Type-C, two HDMI 2.0 ports, a 2.5G RJ45 Ethernet port, USB 2.0 Type-A, and a DC power connector. USB4 offers bandwidth of up to 40 Gb/s and allows you to connect high-speed external drives and compatible high-performance devices.

Fast and stable network connectivity

The computer is equipped with a 2.5 Gb/s Ethernet port and a modern Wi-Fi 6E module, which ensure a fast and stable network connection. This allows you to easily transfer large files, conduct video conferences, use the cloud, and watch high-definition content without interruptions.

Advanced IceBlast cooling system

The GEEKOM A7 utilizes an efficient cooling system based on a large fan, dual pure copper heat pipes, and a dedicated heat sink that draws heat directly from the processor. This design provides up to 52% higher cooling efficiency compared to standard solutions. In practice, this means stable operation under heavy load, lower temperatures, and quieter operation.

Robust construction and VESA mounting

The internal metal frame increases structural rigidity, improves heat dissipation, and ensures a long service life. The computer supports the VESA standard, allowing it to be mounted on the back of a monitor to save desk space. Non-slip silicone pads ensure stability during daily use.

Ready to use right out of the box

The GEEKOM A7 comes pre-installed with Windows 11 Pro, which offers a modern interface, advanced security features, and tools to facilitate multitasking. The computer also supports other x86-compatible operating systems, including popular Linux distributions. It is a versatile solution for both home and professional use.

Included

- GEEKOM A7 Mini PC
- 19 V / 120 W power adapter
- HDMI cable
- User manual

Manufacturer	GEEKOM
Model	A7 2026 Edition
Processor	AMD Ryzen™ 5 7535HS (3.3–4.6 GHz, 6 cores, 12 threads, 16 MB L3 cache, 35 W TDP)
Graphics	AMD Radeon™ 660M Graphics
RAM	16 GB DDR5
Memory Type	Dual-channel DDR5 SO-DIMM
Maximum Supported RAM	64 GB
Storage	512 GB M.2 2280 PCIe 4.0 x4 NVMe SSD
Maximum Supported Storage Capacity	Up to 2 TB
Operating System	Windows 11 Pro
Wireless Connectivity	Wi-Fi 6E
Bluetooth	Bluetooth® 5.2
Ethernet port	RJ45 10/100/1000/2500 Mbps
USB 3.2 Gen 2 Type-A ports	3
USB 4 Gen 3 Type-C port	1
USB 3.2 Gen 2 Type-C port	1
USB 2.0 Type-A port	1
Memory card reader	SD
Audio jack	3.5 mm stereo
