

HEADSET AIRPODS 3 PRO/MFHP4 APPLE

Model: MFHP4ZM/A

Manufacturer: APPLE

EAN: 195950543742

Product Code: 310459

R5,244

The world's best in-ear Active Noise Cancellation.

Up to 2x more than AirPods Pro 2.

Take a closer look.

Sound quality. A new multiport acoustic architecture for deeper bass, a wider soundstage so you hear every note, and stunningly vivid vocal clarity.

Fit and feel. The ear tips are now rotated inward for a more secure fit, and a new layer of foam-infused microspheres increases noise cancellation.

Heart rate sensing. Our smallest heart rate sensor ever pulses invisible light to give you accurate workout metrics from the gym to the track.

Dust, sweat, and water resistance. The first AirPods to be IP57 certified, AirPods Pro 3 can handle the sweatiest workouts and even a sudden downpour.

Touch controls. Use simple gestures like pressing to play and swiping to adjust volume. And the new camera remote makes taking videos or pics a snap.

Charging case. Next-generation Ultra Wideband technology increases the distance of Precision Finding by 1.5x, so you don't lose track of your AirPods.

The best thing you've never heard.

Introducing the world's best in-ear Active Noise Cancellation for the most immersive listening experience ever.¹³ Designed with an upgraded acoustic seal, AirPods Pro 3 automatically adapt to your environment and preferences. And new ultra-low-noise microphones remove even more unwanted sound. So you only hear what you want — in an unheard-of audio experience.

New ultra-low-noise microphones. Using advanced computational audio to remove more noise around you than ever, AirPods Pro 3 let you zone in (or out) when you need to. And five all-new ear tips — including an XXS option — fuse a thin layer of soft foam to the silicone shell to give you even better acoustic performance.

Voice Isolation. AirPods Pro 3 reduce background noise and isolate voices during calls. So whether you're on the bus or in a café, every conversation is loud and clear.

Adaptive Audio. AirPods Pro 3 combine Active Noise Cancellation with next-level Transparency, which makes your voice and the world around you sound even more natural and vibrant, intelligently adapting to your environment to prioritize what you need to hear, when you need to hear it.

Conversation Awareness. AirPods Pro 3 can detect when you're talking to someone nearby and automatically lower the volume of whatever you're listening to. When you're done, the volume goes right back to where you had it.

The sound of science.

Powered by the Apple-designed H2 chip, AirPods Pro 3 feature a completely redesigned acoustic

architecture that brings breathtaking, all-around-you audio to everything you listen to — from your pump-up playlist to your weekly FaceTime call with family.

For your ears only.

AirPods Pro 3 feature next-generation Adaptive EQ, which customizes a sound signature for your unique ear geometry and fit. And Personalized Volume uses machine learning to understand your listening patterns and adapt to your preferences over time.

Adaptive EQ tunes music to your ears in real time based on the fit of your AirPods. Inward-facing microphones measure what you're hearing, then adjust the low to high frequencies of a song — so you get consistently detailed playback, every time.

Personalized Spatial Audio uses the TrueDepth camera on your iPhone to create a custom profile based on the geometry of your head, delivering deeply immersive sound tailored to you.

Dynamic head tracking makes conversations feel like they're happening in the same room — whether you're gaming with friends or hosting a Group FaceTime call with family.

Introducing heart rate sensing.

All-new heart rate sensing helps you track your heart rate and calories burned during workouts. Using LEDs that pulse invisible light 256 times per second — and sensor fusion from the accelerometers — AirPods Pro 3 give you incredibly accurate data for up to 50 different workout types in the Fitness app. And with a more secure in-ear fit, you can go all out and they won't come out.

Fitness app. With just AirPods Pro 3 and iPhone, you can dive into the new workout experience in the Fitness app, which includes things like walking, cycling, and HIIT. You can set your favorite music and podcasts to play automatically when you start a workout. With the new Apple Intelligence-enabled Workout Buddy feature, you can get personalized messages that keep you going. And with access to your Move ring — and even the Burn Bar in Fitness+ — you might just never stop.

IP57 dust, sweat, and water resistance.

A first for AirPods, an IP57 rating means AirPods Pro 3 are more durable than ever. Thanks to precision engineering combined with robust testing, you can feel confident during even the sweatiest workouts.

Check, aid, and help protect your hearing.

AirPods Pro 3 bring improvements to the world's first end-to-end hearing health experience.⁶ Now you can take a scientifically validated Hearing Test in a broader range of background conditions. The Hearing Aid feature adds improved voice clarity, automatic Conversation Boost,⁷ and 67 percent more battery life in Transparency on a single charge.⁸ And active Hearing Protection helps prevent exposure to loud environmental noise.

Battery life. Hearing Aid users now get 67 percent more battery life in Transparency on a single charge. That's a total of up to 10 hours, making it easier than ever to use this breakthrough capability morning, noon, and night.

Automatic Conversation Boost. Now when you're having a conversation in a busy restaurant or office, Conversation Boost will automatically amplify the voice of the person you're talking to while minimizing the distracting noises around you. And with the new microphones, transducer, and amplifier, your voice will sound clearer and more natural than ever.

Hearing Test and Hearing Aid. With a better fit and increased noise cancellation, you can now take a scientifically validated Hearing Test in a broader range of everyday background conditions — from the comfort of your home. And if you have mild to moderate hearing loss, you can use the improved Hearing Aid feature wherever you go.

Magic to your ears.

AirPods Pro 3 are packed with features that make even the simplest moments seem extraordinary. From the all-new Live Translation feature⁵ to superconvenient camera control,¹¹ there's so much more to AirPods than meets the ear.

With Live Translation, powered by Apple Intelligence, you can listen to people speaking in different languages and hear translations through your AirPods Pro 3. To respond, just speak naturally, and

your words will appear in the other person's language on your iPhone screen. To make the experience even more magical, if you both have AirPods Pro 3, you can each speak in your own language and hear translations through your AirPods.

Simple touch controls let you do things like raise and lower volume, skip tracks, and send "Unknown Caller" straight to voicemail. And the new camera remote feature lets you control your iPhone to record a video or snap a pic, even from afar.

With Siri, you can easily ask for directions, make a call, or check your schedule — all without having to fish your iPhone out of your pocket. And with Apple Intelligence, you can now communicate with Siri more naturally than ever.

To set up AirPods Pro 3, just place them next to your iPhone and follow the onscreen prompts. Use Automatic Switching to have your AirPods seamlessly connect to whichever device you're listening to. All you have to do is press play.

Announce Notifications. Siri can read out messages and alerts as they arrive, and you can respond with just your voice. With Siri Interactions, you can even use intuitive head gestures — like a nod or a shake — to answer or ignore calls and texts.

Audio Sharing. Easily share what you're watching or listening to with a friend. Just bring their AirPods near the iPhone, iPad, or Apple TV you're connected to. And voilà.

They're workin' 9 to 5.

The MagSafe Charging Case is full of helpful features — like a built-in speaker and more powerful Precision Finding — that let you keep track of your AirPods Pro 3 no matter where they are. And now just a single charge will take you all the way through the workday. Plus overtime.

Up to 8 hrs

of battery life with Active Noise Cancellation on a single charge

Up to 10 hrs

of battery life in Transparency with the Hearing Aid feature on a single charge
