

GARRETT Z- LYNK MS-3 Headphones

Model: 1627710

Manufacturer: GARRETT

EAN: 786156005211

Product Code: 317788

R3,339

GARRETT Z-LYNK MS-3 Headphones

Receiving signals from a metal detector can be much more precise when nothing holds you back—no wires, no delays. The GARRETT Z-LYNK MS-3 headphones combine wireless convenience with high-quality sound and instant transmission, ensuring every signal arrives exactly when it should. Their comfortable design, long battery life, and rugged durability make them ideal for extended sessions in the field. Plus, volume control and a foldable design make daily use a breeze. This is gear that lets you focus on the signals, not the limitations.

Z-Lynk Technology - An Advantage You Can Hear

The built-in Z-Lynk wireless receiver operates with an impressively low latency of just 17 milliseconds, which means a response up to six times faster than with classic Bluetooth headphones. This transmission time ensures the audio signal arrives exactly when the detector coil is positioned over the target. This translates to greater precision and confidence when locating finds, especially in

challenging terrain where every second and every detail counts.

Clear, interference-free sound

Advanced 2.4 GHz technology with dynamic frequency hopping eliminates the risk of interference and crosstalk with other wireless devices. This allows you to focus exclusively on signals from your own detector. A wide frequency response range from 30 to 18,000 Hz and an impedance of 8 ohms result in clear, detailed sound that makes it easier to distinguish subtle differences between signals.

Customize the sound to your preferences

Individual volume control allows you to precisely adjust the signal level to your individual needs and environmental conditions. This makes it easier to pick up weaker signals and reduce the impact of external noise. In practice, this means greater control over what you hear and better interpretation of the signals generated by the metal detector.

Comfort for long hours of work

The soft headband and comfortable ear pads are designed for extended use in the field. The design fits your head well without causing excessive pressure, allowing you to focus on your search without feeling fatigued. An additional advantage is the foldable design, which makes it easy to store and transport the equipment.

Ready for any expedition

The headphones offer up to 30 hours of battery life on a single charge, allowing you to carry out even long search sessions without interruption. The set includes a USB cable for quick and convenient charging. The housing meets the IP52 standard, providing protection against light rain and dust. The equipment can handle varied terrain conditions, though it is not designed for submersion in water.

Freedom that makes a difference

The absence of wires means not only convenience but also greater mobility and safety when moving through difficult terrain. The GARRETT Z-LYNK MS-3 headphones eliminate the limitations of traditional solutions while offering high-quality sound and a stable connection. This is the choice for those who want to work faster, hear more, and have full control over every signal.

Included

- headphones
- charging cable
- user manual

Manufacturer	GARRETT
Model	MS-3
Volume control	Yes
Impedance	8 ohms
Frequency response	30 to 18,000 Hz
Battery life	30 hours
Protection rating	IP52
