TUF GAMING TR120 ARGB

This case fan stands out with its extra-thick 28mm fan frame, and it is meticulously crafted to provide optimal static pressure and airflow, ensuring heightened cooling performance. Its double-layered LED array and flexible side patterns, synchronized through Aura Sync, are tailor-made for your panoramic chassis or radiators. TUF Gaming TR120 ARGB offers dual colors and orientations, giving you the versatility to master both cooling efficiency and style for your gaming rigs.

THICKER FRAME FOR HIGHER PERFORMANCE

Featuring an extra-thick 28mm fan frame, the TUF Gaming TR120 ARGB case fan establishes a robust foundation, ensuring the delivery of optimal cooling performance.

OPTIMIZED COOLING PERFORMANCE

TUF Gaming TR120 ARGB is meticulously optimized, boasting an impressive 3.3 mmH2O static pressure and a class-leading airflow of 77.4 CFM. Crafted to excel in both chassis and radiator applications, it sets a new standard for cooling performance.

DOUBLE-LAYER LED ARRAY

The TR120 features an addressable double-layer LED array that emits light evenly through each fan blade, leaving ordinary RGB fans looking washed out.

DUO SIDE PATTERNS

Incorporated with dual side lighting patterns, this feature allows for a diverse range of captivating visual displays through versatile arrangements.

DUO COLORS & ORIENTATIONS

The TR120 ARGB is available in both black and white color options, as well as in standard and reverse versions. This versatility enables you to craft your gaming build with a personalized aesthetic while ensuring optimal cooling performance.

MAXED COOLING, BOLD LOOKS

With standard and reverse fans, your PC build can have maximum airflow and present better ARGB lighting without aesthetic compromises.
