Model: 56200

Manufacturer: EASYPix

EAN: 4260041685567

Product Code: 402060

R2,170

With cameras with an OXO 360 ° camera, it has never been easier to keep track of your home with Full HD 1080p full-motion video. Using the DANALE app (for Android and iOS) on your smartphone, you can access your OXO camera room 360 ° at any time and anywhere and see what happens in your home. Just log in and use your smartphone to keep track of your house.

OXO 360 ° has two lenses that take a 360 ° panorama, from right to left and from top to bottom. You can adjust the viewing angle using your smartphone's touch screen.

The OXO 360 ° recording function allows you to shoot photos or video in real time for later viewing. Two-way voice function transmits both sounds from your home to your smartphone, and your voice through the application's internal communication button and built-in speaker in the corresponding room.

You can also set a specific recording time during which the OXO 360 ° automatically saves its recordings to the inserted MicroSD card (not supplied).
