Not suitable for Silk'n ReVit or Silk'n ReVit Essential devices!

Silk'n ReVit Prestige activates the skin's own revitalization by combining two functions.

Microdermabrasion exfoliates dead skin cells, while vacuum stimulation cleanses clogged pores, brings impurities to the surface, and collects and eliminates dead skin cells.

Thus Silk'n ReVit Prestige ensures a better skin complexion and an optimized texture and elasticity of the skin.

Flat acne scars and age spots are alleviated. This leads to a radiant, softer and younger appearing skin.
