Model: TRAADA46350

Manufacturer: TRACER

EAN: 5907512863770

Product Code: 402246

R717

DESCRIPTION If you have a mobile phone with wireless charging, and at the same time you are an active person and you value unlimited solutions, our device will surely catch your attention. The 10W charger is compatible with all devices equipped with wieless charging function, also with 5W charging. One thing is certain - wireless charging is the future, and we will also secure your phone with strong suction cups! Meet TRACER WIRELESS MOBILITY! Its advantage is the ease of use of the phone even while charging. TRACER WIRELESS MOBILITY is equipped with 8 suction cups, as well as a head that allows you to easily write messages, play your favorite battles or take photos, even when we are in the process of charging the energy level on our smartphone. Most importantly - the presented product is fully safe for use, because after attaching it to the suction cups, the possibility of dropping the phone also…drops. The temperature is always under control, because the charger does not heat up due to specially selected materials. TRACER WIRELESS MOBILITY means maximum comfort and easy use. The device is light, portable, easy to take on a journey. It can be used through the phone case, which will not affect the quality of charging. A huge advantage is the extended stand of the device. It can be used as a telephone stand when watching a movie, reading
