R1,562

BEPER 50.002 - Ironing system with pressure gauge

Description

Plate: The high-quality aluminum plate guarantees maximum softness, in each type of fabric, with holes to generate steam and facilitate ironing.

Boiler: The ironing system has a high-pressure boiler, equipped with a safety lid. The tank contains up to 850 ml of water and a warning light will come on shortly before finishing.

Steam: The pressure is 3.5 bar, equipped with a pressure gauge to check the steam pressure at any time. Thanks to the practical knob, it is possible to adjust the temperature of the iron and the power of the steam generated. It is equipped with a steam indicator light to indicate when the powerful jet can be used. There is also the possibility of using the continuous steam or dry function, thanks to the separate iron and boiler power buttons.

Safe: Comfortable base with cable reel, to wind the power cord after use, and non-slip mat to ensure the stability of the appliance.

Features

Power: 2100W

Aluminum plate
