Smoother, Firmer, More Radiant Looking Skin

HoMedics Remove Microdermabrasion

Bringing professional spa skincare to your own home.

Remove Microdermabrasion is perfect for restoring youthful radiance to the skin, improving skin tone and texture, smoothing the appearance of fine lines and wrinkles, and reducing the appearance of age spots and sun damage.

Use regularly to maintain youthful-looking skin.

Remove and Renew

Remove gives your skin a thorough spring clean. Remove is designed with a diamond encrusted tip to deeply exfoliate the epidermis whilst the gentle vacuum massage sucks away and filters the outer layer of dead skin cells.

By clearing away the dead skin, you can make way for fresh cells to grow, leaving you with a smooth and radiant complexion. Like any deep exfoliation, a good moisturiser after every treatment is a must to make way for firmer and hydrated skin.

Exfoliates...

There are two diamond encrusted tips to choose from, for normal and sensitive skin types. For the best results, we recommend one five minute treatment up to three times a week on clean and dry skin. Use regularly (for at least 3 weeks) to enhance the reduction of fine lines, wrinkles, blackheads and enlarged pores.

...and soothes

Once you've finished, turn Remove around and apply the cooling surface to the treated area to soothe the skin post-treatment.

What's in the box?

- Remove Microdermabrasion
- 2 diamond tips - normal & sensitive
- Charging base
- Cleaning brush
- Travel bag
- Replacement wool filters
- USB cable • Instruction manual
