

HoMedics BPA-P200-EU1 blood pressure unit Upper arm Automatic

Model: BPA-P200-EU1

Manufacturer: HOMEDICS

EAN: 5010777158182

Product Code: 404027

R1,660

Provides quick, accurate blood pressure and pulse rate readings from the comfort of your home, the Pregnancy Accurate Automatic Arm Blood Pressure Monitor uses a clinically proven algorithm to deliver real-time results.

Designed to work both in and out of pregnancy and during stages of pre-eclampsia, this device saves 100 memories for up to two people. With irregular heartbeat (arrhythmia) detection, heart rate variability monitoring and automatic date/time stamps, this blood pressure monitor makes it simple and straightforward to keep track of your blood pressure, whether you've got a baby on board or not.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.
