

Subsonic Wireless Led Controller Red for Switch

Model: SA5633-3

Manufacturer: SUBSONIC

EAN: 3701221702526

Product Code: 404215

R969

The Switch wireless controller from Subsonic is compatible with Switch oled and Switch lite, it reproduces the same functions as the Nintendo Switch pro controller. Thanks to its ergonomic design, it offers a very good grip, much more comfortable than the Switch joy con controllers for multiplayer games.

This Switch controller offers 9h / 10h hours of play time. A USB-C charging cable is included for recharging.

A complete controller:

The Wireless Led controller is equipped with motion sensors (6-axis gyroscope and accelerometer) so you can play Mario kart 8 deluxe simply by tilting the controller Switch, just like with the Switch joy-con.

It's also equipped with programmable LEDs and looks really fun and cool.

This controller for Nintendo's Switch console offers 3 levels of vibration. The intensity of the vibrations can be adjusted to suit your style of play.

For fans of esports FPS, Subsonic's Switch bluetooth controller comes with 2 additional buttons, M1 and M2, located on the rear of the controller pro to enhance gaming performance. These 2 rear paddles are programmable and can reproduce all the other buttons.

Subsonic's pro controller also features a turbo function, ideal for multiplayer games like Mario party. The controller's Home button can be used to power up the console remotely, just like the Switch Pro controller.
