30,000Pa Vormax suction cleans up debris at a low noise level, allowing you to enjoy a serene environment during cleanup. The HyperStream detangling DuoBrush detangles 100% of hair, using a bristled rubber brush and a TPU rubber brush.

Ever-Fresh Water, Ever-Clean Floors

The industry's first FluffRoll tech has a module placed behind the roller, spinning in the opposite direction faster than the roller. This keeps the roller constantly clean, enhancing cleaning performance on floor seams.

Automated 100°C Roller Self-Cleaning

After intensive cleaning, its ThermoHub roller activates a high-temperature self-wash that reaches up to 100°C to target residues and odors while refreshing itself.

Obstacles out of the Way

The FlexRise air suspension system tackles thresholds, rugs, and transitions with ease—clearing up to 8cm obstacles. This allows Aqua 10 Ultra Roller to clean up dirt in complex areas across various floor types.
