

# CAMERA OSMO ACTION 5 PRO/ADVEN CP.OS.00000350 DJI

Model: CP.OS.00000350

Manufacturer: DJI

EAN: 6941565981059

Product Code: 406078

## R10,195

**Elevate Action Camera Image Quality**

**Get Into Revolutionary Imaging**

**Next-Gen 1/1.3″ Sensor**

Our new sensor captures your best. From city nights to dramatic sunrises, get crystal-clear images with a 4nm chip. Experience vibrant imagery with 2.4 µm pixels and 13.5 stops of dynamic range, rivaling pro cameras.

Shoot in 4K/60fps for breathtaking high-dynamic low-light video, maintaining a balance of highlights and shadows without overexposure.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

SuperNight mode uses AI noise reduction algorithms for sharper, cleaner footage in extreme low-light.

**Crystal Clear OLED Touchscreens**

Catching the day's action? See it clearly thanks to the rear OLED screen's peak brightness now reaching a whopping 1000 nits. Make sure each shot has rich colors and high contrast with the front and rear OLED high-brightness touchscreens. The screens are larger with narrower bezels increasing the screen-to-body ratio by 16%.

Tempered glass ensures durability, and the AF coating keeps touch controls responsive, even when wet. [4] With Always On Display enabled, both screens show recording duration and specifications for lower power consumption. Get essential information at a glance, without being disturbed by bright lights at night.

**Color All The Bases With 10-bit D-Log M**

Action 5 Pro's front and rear touchscreens let you preview 10-bit D-Log M footage with color recovery, so you can adjust color and brightness for top-quality raw footage at a glance. Get more color depth with 10-bit D-Log M and 10-bit HLG modes. Detailed highlights and shadows ensure your footage will stand out from the crowd.

**Bursting With**
**40MP of Action**

Simply press the shutter for stunning shots and crop with confidence. Each photo boasts approximately 4x the clarity of the previous generation with roughly 40 megapixels (7294×5472) or 8K (16:9) resolution.

**Spark Your Wild Side**

High-Octane Features for Go-Getters

**Everything's On Track Now**

DJI brings subject tracking to an action camera. Action 5 Pro now intelligently detects the subject's position and dynamically adjusts the composition. Keep the subject centered in every frame, during horizontal or vertical shots.

**4-Hour Power**

We're setting a new benchmark for action camera battery performance. A single battery now delivers up to four hours of continuous use. Never miss awesome with 50% more operating time compared to Action 4. Even in low-temperature conditions get up to 3.6 hours recording time at temperatures as low as -20° C.

**Stabilize to Maximize**

**360° HorizonSteady**

HorizonSteady not only effectively reduces shakes but also corrects horizontal tilts within a 360° range, handling intense bumps and rotations effortlessly.
HorizonBalancing only corrects horizontal tilts within a ±45° range and supports video recording up to 4K/60fps.

**RockSteady 3.0**

This mode effectively reduces shakes while retaining the dynamic impact of motion, delivering a more immersive first-person perspective and supports video recording up to 4K/120fps.

**Master Every Scene**

**Flexible, All-Scene Creativity**

**Built-in Professional Water Pressure Gauge for Intelligent Recording**

Action 5 Pro allows you to check real-time underwater depth and duration while diving or swimming. You can also enhance your footage by adding depth data in the Mimo app. The camera automatically starts or stops recording upon entering or exiting the water, allowing you to capture every thrilling moment while facilitating crisp and efficient shooting.

**OsmoAudio Connectivity Ecosystem, Professional Audio Recording**

Action 5 Pro connects directly to the DJI Mic 2 Transmitter with the DJI OsmoAudio connectivity ecosystem, enabling ultra-high-sample-rate audio recording. This setup provides studio-quality sound while eliminating the need for a receiver, so you don't need to worry about gear falling off during your ride. When paired with two transmitters, conversations are captured clearly. Additionally, with Built-in Mic Audio Backup enabled, Action 5 Pro simultaneously records ambient

sounds, adding a rich layer of authenticity to your video.

**32x Super Slow Motion**

Surpassing traditional 8x slow-motion video, 32x super-slow-motion video captures richer details of jumps, spins, and flips, highlighting your unrivaled prowess.

**Multifunctional Charging Handle**

Provides approximately seven hours of operating time for Action 5 Pro, allowing for convenient outdoor charging anytime. It integrates camera control, magnetic quick-release, ball-joint adjustment, 3.5mm audio adapter, tripod support, and a 1/4″ thread hole for functional expansion, eliminating the need for cumbersome accessories. Compact and easy to store, it adds no extra burden to your travels.

**Practical Features, Enhanced Performance**

**Mimo App: Intelligent Shooting and Editing**

Once wirelessly connected to Action 5 Pro, the Mimo app allows you to preview the camera view and adjust the settings. It comes with a variety of editing templates and a One-Tap Edit feature. The Mimo app also includes diverse editing features for action cameras, such as Sports Dashboard, Vivid Underwater, and InvisiStick.

**Background Download**

While downloading footage, the Mimo app can continue to download in the background even if you switch to other apps on your smartphone.

**D-Log M Color Recovery**

The Mimo app supports color recovery for D-Log M footage, allowing for more stylish adjustments. This process is quick and convenient, with no computer required.

**Live Photos & High-Definition Screenshots**

The Mimo app can generate static and live photos, including model information and shooting parameters. Traditional video screenshots are limited to screen resolution (approximately 1080p to 2K), while DJI's Screenshots feature can capture high-definition photos up to 4K resolution, maintaining the original quality.
