

Amazfit Cheetah 2 Pro 3.35 cm (1.32") AMOLED 48 mm Digital 466 x 466 pixels Touchscreen Titanium Wi-Fi

Model: W2563GL1N

Manufacturer: AMAZFIT

EAN: 6972596109921

Product Code: 406136

R9,020

Refined Performance.

Cheetah 2 Pro is engineered for marathon runners who train with discipline and recover with purpose. Progress does not come from a single workout. It comes from purposeful training, building strength alongside endurance and following a structure that develops the body over time.

Built for runners who prepare with intention, Cheetah 2 Pro supports more than just miles and splits, bringing together the strength, recovery, and discipline that drive performance.

Titanium Strength. Structural Lightness.

Built for refined performance and structural lightness, the design removes unnecessary material, so every element supports speed, strength, and efficiency. Designed for long-term preparation, Cheetah 2 Pro helps bring clarity to every phase of training, so you can balance effort, recovery, and progress with confidence.

Purpose-Driven Workouts.

Structured workouts guide every phase of your training cycle. From half marathons to Fartlek runs and integrated strength work, each session helps balance endurance, strength, and recovery while bringing clarity and intent and intention to how you train over time.

Ready Battery.

Engineered to sustain long efforts without compromise. Up to 31 hours in Accurate GPS mode, 69 hours in Power Saving GPS mode, and up to 20 days of typical use[1], delivering the endurance needed

Pace with Precision.

Six satellite positioning systems, a circularly polarized antenna, and Point Dead Reckoning technology deliver precise pacing and reliable tracking even when signals weaken or the course twists. Your data stays on course, so your pace stays on target.

Stay On-Track.

Download offline maps and follow turn guidance directly from your wrist. Plan routes ahead of time or import courses to stay confidently on track during long runs and race preparation.

Own the Route.

Automatic Rerouting

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

itworkup.co.za | sales@itworkup.co.za | +27 (11)541-9950

If you move off course, automatic rerouting calculates a new path based on your real time location and destination, helping you stay focused on the run instead of the route.

Points of Interest Search

Need a quick pit stop? With offline maps, search nearby points of interest right from your watch.

Turn-By-Turn Navigation

Get guided and stay on track with turn-by-turn directions that update in real time. Whether you're navigating rugged trails or race checkpoints, you're always headed the right way.

Point-to-Point Route Planning

Set a target distance and direction and the watch generates optimized round trip routes, helping you explore new paths while keeping your training distance on track.

Light the Way Forward.
Dual mode LED illumination with white and red-light options improves visibility during early morning and late evening runs, with Boost and SOS modes that add confidence when training in low light conditions.

Train Smarter, Recover Better.
BioTracker™ technology tracks heart rate during workouts to help you understand effort and intensity in real time. Heart rate zones reveal when you are building endurance, improving speed, or pushing too hard, while sleep, blood oxygen, and stress insights help balance training and recovery.

Train Hybrid. Prepare Better.
Hybrid Training is a structured training approach that combines endurance, strength, and recovery into a balanced system designed to improve long-term performance. Within the Zepp App, this philosophy is supported through training tools such as Focus and Weekly Structure, which help you understand how your training is distributed across different types of workouts.

Focus highlights what type of training your body is best suited for each day, whether endurance, strength, or recovery - while Weekly Structure visualizes how your workouts are balanced throughout the week.

Stay Connected. Stay in Rhythm.

Make and receive Bluetooth calls from your wrist while Zepp Flow™ voice control and speech to text replies on supported Android devices help you stay connected without interrupting your run.

Contactless Payments.

Pay without breaking stride using Zepp Pay — your workouts don’t stop at the checkout line. With the integration of NFC technology, Zepp Pay allows you to bind up to eight bank cards at a time to your watch for password-protected contactless payment directly from your wrist.

What's in the Box

At Amazfit, we try to do our part to give you the tech you need to achieve your goals, while making sure it's done in a sustainable way. That's why your Cheetah 2 Pro will come packaged in 100% recyclable materials, with a charging base (USB Type-C compatible) in the box - but no cable, to reduce waste on our side and extra cords at home on your side.
