Stronger Seals. Greater Adventures

The side keys are crafted from aerospace-grade aluminum alloy, offering outstanding rust and corrosion resistance. Sealed with silicone waterproof rings, they ensure long-lasting durability and reliable water protection, no matter the environment.

The speaker and receiver are expertly designed with internal and external waterproofing. Special materials and fine mesh filters block water and fine entry, while silicone seals add extra protection. This ensures clear, uninterrupted sound, even in wet conditions.

The USB and SIM card port covers are made from TPU soft rubber and undergo a pre-loading process for a secure, tight seal. Rigorously tested tens of thousands of times, they provide 99% protection against water and dust, keeping your device safe in any environment.

The camera screens use Caihong Glass, securely sealed with high-strength waterproof adhesive to block water penetration. They stay intact even when submerged.

Speaker Cleaner uses powerful sound waves to shake off trapped dirt and moisture, keeping audio clear and loud.

MIL-STD-810H Standard

Defy the Elements. Keep Moving

Engineered to MIL-STD-810H standards, the Blackview BL7000 endures extreme conditions, from intense heat and cold to shock and humidity, ensuring you stay connected no matter what.

Reinforced for the Roughest Falls.

The Blackview lab ran tens of thousands of tests to perfect BL7000's anti-collision design. With a reinforced rubber buffer and optimized impact angles, it offers superior drop protection while maintaining a sleek, stylish look.

Engineered for toughness, the rigid shell and soft rubber combine to create an ultra-durable, impact-resistant back cover. Designed for maximum protection without sacrificing style, it offers a premium feel and superior shock absorption.

The aerospace-grade aluminum alloy frame seamlessly blends with the body, reinforced by high-strength screws for added stability and impact resistance. Whether in daily use or extreme
