

MANUAL CALL POINT/RED 60815 AJAX

MANUAL CALL POINT/RED 60815 AJAX

Model: 60815

Manufacturer: AJAX

EAN: 4823114045219

Product Code: 406837

R3,338

ManualCallPoint is a fast and straightforward way for anyone to activate the fire alarm. Pressing the button triggers the built-in sirens of all fire detectors in the system and informs the users. Meanwhile, the central monitoring station (CMS) receives the alarm and calls emergency services. All the data is instantly available in Ajax apps: which device was triggered, when, and where. In a life-endangering situation, Ajax innovative features follow an alarm in seconds: automation scenarios de-energize the facility, turn the emergency lights, and unlock the exits.
