

FLASHLIGHT PRECISE SERIES/4000 LUMENS P10IX NITECORE

Model: P10IX

Manufacturer: NITECORE

EAN: 6952506406708

Product Code: 406893

R3,515

The P10iX is the Xtreme Performance i-Generation 21700 Tactical Flashlight designed with the i-generation ultimate revolution. The groundbreaking i-Generation technology has brought infinite possibilities to the design of tactical flashlights. It is now unprecedently upgraded to enable a more reliable and rapid operation of tactics with an Xtreme performance.

Utilizing 4 x CREE XP-L2 V6 LEDs, the P10iX has a max output of 4,000 lumens, a max throw of 158m and a peak beam intensity of 6,250cd, ideal for law enforcement, assault operations, self-defense, search and patrols. The independently controlled quadruple LEDs are powered by a constant current circuit to provide a durable usage with guaranteed safety.

The ultimate dual tail switch design includes the Tactical Tail Switch for momentary-on and constant-

on illumination and the STROBE READY™ Mode Button for output adjustment and instantly accessing STROBE / TURBO. The randomly changing STROBE Mode with randomly changing frequencies can cause stronger dizzying effects due to the inadaptability of the naked eyes. With two user modes available, it has the Daily Mode specially designed for daily uses and the Tactical Mode for self-defense and operations. When the light is off in Tactical Mode, half press or full press the Power Button to directly access TURBO when STROBE is not memorized. The instant dazzle strike of 4,000 lumens enables an abrupt disturbance to your adversary, ideal for self-defense and law enforcement.

The P10iX is powered by a 21700 i Series Battery and compatible with 2 x CR123/RCR123 batteries. As a patent product developed by NITECORE, the 21700 i Series Battery is a proprietary 21700 rechargeable Li-ion battery featuring dual way output with positive and negative polarities at both ends and a high energy density. Thanks to the groundbreaking technology and techniques, it enables a highly efficient output by minimizing the loss of power due to internal resistance and is compatible with modular extensions of intelligent communications and controlling systems. It offers 350 hours ultra long runtime which enables a consistent usage of 14 days on ULTRALOW.

The USB-C charging port is available with a reversible plug-in. The charging port cover provides excellent water, dust and impact resistance. The integrated ATR technology regulates the output of the P10iX according to the working condition and ambient environment to maintain the optimal performance.

The P10iX is ultra compact and lightweight with a standard tube diameter of 1” (25.4mm) and compatible with NITECORE gun mounts including GM02MH, GM03, GM04 and more. Specially designed for law enforcement, the included compact NTH10 Tactical Holster enables a quick draw of the flashlight with an adjustable stopper on the clip to suit belts of various sizes and compatible with the MOLLE System. It can be used combined with NTR10 Tactical Ring Pro, which can keep a two-handed grip of the firearm while carrying or operating a flashlight, easy for continuous and stable shooting and reloading. Other optional accessories include the TSL10i signal light and F21i fast charging power system. It is all-weather applicable, IP68 rated, 2m submersible and waterproof, and 2m impact resistant.
Summary: Nitecore P10iX. Flashlight type: Hand flashlight, Product colour: Black, Housing material: Aluminium. Waterproof up to: 2 m, Shockproof up to: 1 m, International Protection (IP) code: IP68.
