

PEDALS SAITEK PRO FLIGHT/RUDDER 945-000005 LOGITECH

Model: 945-000005

Manufacturer: LOGITECH

EAN: 5099206069916

Product Code: 406914

R3,131

Saitek's Pro Flight Rudder Pedals add another layer of realistic control to your flight simulation setup. Control the rudder and toe brakes of your aircraft with your feet – just like actual pilots. These self-centering pedals with adjustable damping are a perfect complement to the Saitek Pro Flight Yoke. The Rudder Pedals' fluid motion enables accurate command over your aircraft, while differential braking provides independent control of the left and right toe brakes. The foot rests adjust to accommodate a wide range of sizes and include non-slip materials to help keep the pedals on the floor during virtual flight.

- Smooth and accurate self-centring rudder pedals provide precise command of your aircraft, both in the air and on the ground when taxiing.

- Whether you prefer the lighter response of a small aircraft or the more robust feel of a heavy jet, a simple twist of the adjustable tension dial will have you flying your way.
- Differential toe brakes deliver the full control you need when bringing your aircraft up to its stand on the runway.

Saitek

Summary: Logitech G G Saitek PRO Flight Rudder Pedals. Device type: Flight Sim, Gaming platforms supported: PC, Gaming control technology: Analogue / Digital. Connectivity technology: Wired, Device interface: USB 2.0. Product colour: Black, Silver. Windows operating systems supported: Windows 10, Windows 7, Windows 8, Windows 8.1.
