ASUS RP-AX58 Network transmitter White 10, 100, 1000 Mbit/s

Model: RP-AX58

Manufacturer: ASUS

EAN: 4711081440451

Product Code: 407332

R2,454

AX3000 Dual-band WiFi 6 (802.11ax) Range Extender/ AiMesh Extender for seamless mesh WiFi; works with nearly any WiFi router

WiFi Dead Zone Eliminator

AX3000 WiFi 6 Range Extender

Extend WiFi Across Your Home

Enjoy unrivaled wireless performance across your home with a RP-AX58 dual-band range extender, which extends wireless coverage of up to 2,200 sq. ft. Get WiFi where you couldn’t before!

Powerful WiFi 6

Performance

The RP-AX58 provides 160 MHz bandwidth* for dramatically faster wireless connections. With a total networking speed of up to 3,000 Mbps, the RP-AX58 is 2.5X** faster than a WiFi 5 2x2 dual-band repeater. With up to 4X higher network capacity, it can handle more streaming, gaming, and smart home devices simultaneously. The more efficient transmission scheduling can also greatly extend the battery life of your IoT gadgets and reduce network congestion.***

*160 MHz bandwidth may be unavailable in the 5 GHz band in some regions/countries, due to regulatory restrictions. And to benefit from WiFi 6 router features, compatible WiFi 6 devices are required.
**The data compares speed of 2x2 11ax on 5 GHz 160 MHz bandwidth with 1024QAM modulation to speed of 2x2 11ac on 5 GHz 80 MHz with 256QAM modulation.
***It requires 802.11ax-compatible devices to enjoy the benefits brought by 802.11ax WiFi standard.

Whole-home

AiMesh WiFi System

ASUS AiMesh technology lets you easily use the RP-AX58 with another AiMesh-compatible router to expand the coverage of your WiFi network. You can also apply complete features of those connected ASUS routers to the overall mesh network.

Works with Nearly

Any WiFi Router

In addition to ASUS AiMesh-compatible devices, the RP-AX58 can work with a wide variety of other WiFi routers, modems and gateways. Connect the RP-AX58 to your current router to enjoy an expanded WiFi network!

Flexible Backhaul Connection

When RP-AX58 works as an AiMesh node or in Access Point (AP) mode, you can simply connect it to your router with an Ethernet cable. This backhaul reserves the entire 2.4 GHz and 5 GHz band to your wireless devices to create more stable and reliable connections.
