Introducing the world's first durable external hard disk with RGB lighting. With the HD770G, not only can you store all your games and data, but store them with flair. What is more, the HD770G exceeds the IP68 standard meaning it's waterproof and dustproof and is shock-resistant with its robust triple-layer construction. What more could you ask for!

Store with Flair

The HD770G sports a design like no other external HDD thanks to its distinct chamfered edges and two light-beam-shaped RGB strips that'll show your flair. What's more, in between the two light strips is a centerpiece that features a perforated pattern that comes to life as the RGB lighting pulsates.

Military-Grade Tough

The HD770G is designed to be tough like a warrior! Meeting the MIL-STD-810G 516.6 standard, this external HDD can survive nasty falls from up to 1.22 meters, protecting everything you have stored inside from harm.

Triple-Layer Protection

With a robust triple-layer construction that consists of a shock-absorbing silicone casing, sturdy buffer and a cushioned mounting for the hard drive, the HD770G can handle just about anything your clumsy hands can throw its way.

Protect Your Games from Water and Dust

The HD770G offers the ultimate protection against dust and water that goes beyond the highest-level IP68 standard. In particular, the HDD is waterproof to the point where it can withstand 120 minutes submerged in 2 meters of water.

Your Gaming Stockpile

With plenty of storage capacity, carry all your games with you, and supplement the limited storage on your PS4 or Xbox console. Not only is the HD770G great for console gaming, but also great for PC gaming too!

Data Security with AES Encryption

AES 256-bit encryption keeps the data inside password-protected and away from prying eyes.

Patented Port Covers

Unlike the cumbersome port covers found on other external HDDs, the HD770G's patented port covers plug in with ease to provide hassle-free protection from water.

- Two light-beam-shaped RGB strips
- Military-grade shock-resistance – Drop-tested from 1.22m
