Trim nose, ears and eyebrows with total comfort

Easily reach and remove unwanted nose and ear hair efficiently. Ensure your nostrils are clean before use and carefully insert the trimmer inside your nose no more than 0.5 cm and slowly circulate it. When trimming ear hair, ensure ears are free of wax. For brow hair, slide one of the two combs (3 and 5 mm) into the grooves and trim with light pressure moving against the hair growth for an even eyebrow trim to the length you want.

Our protective skin guard provides an easy and safe trim

Our Protective Guard System provides a cover over the blades designed to ensure they will never be in contact with your skin while safely guiding your hair towards the cutting element. The Protective Guard has been engineered to make trimming comfortable and safe, minimising missed hair whilst protecting against hair pulling, tugging or nicks and cuts.

Effortlessly trim hair with a fast-moving dual-sided cutter

Our innovative cutter is dual-sided to ensure all hairs are cut quickly and effortlessly from any angle and in any direction. The blades are made of durable stainless steel and designed to last.

Textured handle with on/off sliding switch

Easily turn on/off your device with one hand. The textured handle gives you the best hold, even when wet, for better control when you operate your trimmer.

Fully washable for easy cleaning

This trimmer is water resistant, so it is easy to clean: just rinse it under the tap.

AA battery included in the pack

This trimmer runs on one AA battery that is included in the box, so your trimmer is ready to use right away. To change the battery, open the device by gently turning the bottom part to the left. Pull the bottom towards you to reach the battery compartment.
