COMFORTABLE TO USE AND EASY SETUP

Radium 100 microphone is Plug&Play, which means it doesn’t require configuration or installation of dedicated software. Flexible arm, ability to connect headphones and dedicated mute button make Radium 100 good solution for a gamer and a streamer alike. The microphone connects via USB which additionally increases its versatile character.

EFFECTIVE AND OMNIDIRECTIONAL

The microphone has omnidirectional pickup characteristic, which means that sounds are picked from every direction with the same sensitivity. This makes it much easier to set-up the microphone as it does not require a precise positioning in front of your mouth.

FUNCTIONAL AND DURABLE

A long 1.5m cable in black and red braid and effective LED lighting add character to the microphone thanks to which it will look good on every desk. The backlight has another useful function, when the microphone is muted it is dimmed - thanks to this the player knows well when the microphone is active and when it is not.
