

GENESIS NGM-2157 microphone stand Boom microphone stand

Model: NGM-2157

Manufacturer: GENESIS

EAN: 5901969444384

Product Code: 415920

R1,557

Discover the Thulium 700 - a professional microphone arm designed for the most demanding users. Compatible with 99% of microphones on the market, the Thulium 700 arm is the answer to the growing needs of gamers, streamers and content creators.

Discover the Thulium 700 - a professional microphone arm designed for the most demanding users. Compatible with 99% of microphones on the market, the Thulium 700 arm is the answer to the growing needs of gamers, streamers and content creators. It offers exceptional robustness and stability, and its unique design allows it to work with microphones weighing up to 1 kg. Thanks to its adjustable tension force and greater folding angle than competing models, the Thulium 700 allows convenient mounting in a wide range of comfortable positions on the desk.

ROBUST DESIGN FOR STABLE SUPPORT

The Thulium 700 features an extremely robust design, providing high stability even for large and heavy microphones and other audiovisual equipment, such as cameras and additional lighting. The sturdy design keeps the arm stable in its set position, which is crucial for professional recording without vibration or wobble. The relatively high minimum tension force reduces the risk of damaging equipment even with extreme tilting.

RELIABLE MOUNTING ON VARIOUS SURFACES

The Thulium 700's advanced mounting system allows the arm to be attached very securely to a desk top 18-60 mm thick using the original clamp. Alternatively, for countertops 10-60 mm thick or with a beveled edge, a 10 mm diameter screw mount can be used, with the option to drill through the countertop. Both solutions provide unparalleled flexibility and installation security in any working environment.

TENSION ADJUSTABLE TO MICROPHONE WEIGHT

The Thulium 700 arm is equipped with a tension adjustment system that allows you to easily adjust its position according to the weight of your microphone or other compatible device. To adjust the tension, simply tighten or loosen the screw hidden inside the base of the arm and adjust the 3 lock knobs of the desired position. Proper tension adjustment will ensure that subsequent position changes will not require tightening the knobs for the same device.

DIFFERENT BENDING ANGLE FOR ELASTIC SETTING

Thanks to its special design, the Thulium 700 arm allows a great deal of flexibility in terms of bending angles, and therefore easier adjustment of microphone positions, compared to other arms on the market. The lower part of the arm can be bent back by a maximum of 152°, while maintaining an angle of 55.5° between it and the upper part. This feature is extremely useful for gamers, streamers and content creators, allowing the accessory to be positioned close to the face while keeping the arm at the desired location in the recording frame. The maximum bending angles are illustrated in the graphic - it is worth noting that they may vary slightly depending on the set tension.

ADAPTERS FOR VARIOUS MICROPHONES

AND OTHER EQUIPMENT

The Thulium 700 kit includes a discrete blackened 3/8" to 5/8" adapter, allowing us to mount almost any microphone available on the market, including our flagship Radium 600 G2. In addition, the arm is equipped with a 1/4" photo thread adapter, so we are able to hook up a wide range of other audio-visual devices, such as cameras and camcorders, additional lighting, smartphone holders and more. Thanks to the matte black coloring, the adapters fit perfectly into the design of the arm and do not give unwanted reflections in recordings with strong light.

ORGANIZATION OF CABLES

THANKS TO SPECIAL CLIPS

The Thulium 700 arm comes with up to two sets of interchangeable clamps for USB and XLR cables of 6 mm and 8 mm thickness, respectively. Each set includes 4 clamps, 2 for each of the long parts of the arm. With these, you can avoid cable slack (especially thinner USB cables) and maintain perfect order and aesthetics in your workspace, which is especially important in professional recording environments.

ELEGANT AND ATTRACTIVE FINISH

The Thulium 700 arm is finished in gaming colors of black, red and gun metal, which translates into a universally appealing look on streams and videos. With a sleek finish and consistent design to match our Toron 531 headphones, the Thulium 700 creates a stylish and professional gaming headset whose upscale look fully reflects its build quality.
