The lightweight design of the ergonomically shaped mouse will provide comfort and will not burden your wrist even during long gaming sessions. With silent switches you can play at any time of the day without worry of making noise.

RELIABLE SENSOR

Precision during operation is delivered by an optical sensor with a maximum resolution of 6400 DPI. Thanks to the DPI change button, the cursor speed can be adjusted in as many as 6 settings, which will allow the mouse to perfectly adapt to any type of game. Thanks to the indicator, you will know which setting you are on.

PHENOMENAL DESIGN

The mouse is equipped with extremely impressive RGB backlighting with PRISMO effect, which will allow you to personalize the appearance of your workstation. Choose the right colour from 16 million colours and create a climate worthy of a winner!

ADVANCED SOFTWARE

Krypton 220 comes with dedicated software that allows you to assign your favourite player features to each of the 6 programmable buttons. The software also allows you to record macros and personalize numerous settings.

BUILT-IN MEMORY

The mouse has built-in memory, so you don't have to configure settings every time you connect it to another computer. Krypton 220 will remember all your settings, so you can easily take your mouse on a trip or tournament.
