Sony INZONE mouse Gaming Right-hand RF Wireless Optical 30000 DPI

Model: MSEG500B.CE7

Manufacturer: SONY

EAN: 4548736171220

Product Code: 416246

R3,687

Developed with Fnatic

INZONE Mouse-A delivers an esports-ready grip refined through pro insights and multiple prototypes. From the wheel to the primary clicks, it’s built for comfort and focus during intense matchups.

48.4g. Optimised lightweight. Refined with Fnatic pros.
Refined to 48.4g based on pro feedback, INZONE Mouse-A helps reduce fatigue and sharpen control over extended play. Its polyamide frame, engineered with hollow glass microspheres to reduce weight, delivers a stable feel with minimal flex.

Form for the grip of the game

INZONE Mouse-A’s esports-fit shape was crafted through feedback from Fnatic’s top players. From the sculpted grip to the tuned click feel, every element is designed for effortless control and long-session comfort, so you stay sharp, round after round.

3950IZ sensor. Fast, precise, relentless.
Our custom 3950IZ sensor delivers up to 30,000 dots-per-inch (DPI) of tracking resolution, dramatic linear accelerations with up to 70G of force, and 750 inches-per-second (IPS) imaging for wide sweeps and pinpoint accuracy even at elite-level speeds.

8000Hz polling for ultra-fast input response

INZONE Mouse-A supports custom polling from 500 to 8000Hz, communicating via its USB dongle for stable, low-latency performance. High-speed transmission reduces input lag and enables sharper tracking—fine-tuned for peak control in competitive play.

Stable 8000Hz performance with INZONE tuning

The 3950IZ sensor delivers steadier 8000Hz polling over time, unlike other leading competitors—such as X and Y in the comparison table—which show sharp drops mid-game. INZONE holds strong, session after session.

Light-speed clicks with optical switch

The optical switch reacts on light, not friction—delivering faster input and smoother keystrokes. Built for long-term reliability, it offers precise, consistent control from the first press to the final round.

Fast-charging, 90-hour battery life

With up to 90 hours of use and a 5-minute quick charge delivering an extra hour of play, the INZONE Mouse-A keeps you in the game longer.
