

i-tec Universal 5x 4K/60Hz Display Docking Station + Power Delivery 100W

Model: CA5MONITORDOCKPD

Manufacturer: I-TEC

EAN: 8595611707001

Product Code: 416411

R4,623

The highest performance docking station possible! Supports up to five external monitors* with 4K/60Hz resolution. And one monitor can even run at 8K/60Hz! The ideal dock product for users who require multiple monitors without compromising on image stability, resolution and refresh rate. The dock also features two USB-C fast charging ports (with up to 15W charging power), especially for charging smartphones and tablets, as well as fast USB ports, a 2.5Gbps LAN port, and other peripherals.

The docking station can be connected to virtually any notebook regardless of make, model or operating system type. Any USB port* is sufficient.

The dock can be installed behind the monitor (if it supports a standard VESA mount), using the i-tec VESA mount.
