Effortless Control At Your Fingertips.

Designed with user comfort and precision in mind, these dials are a game-changer for professionals and enthusiasts alike. The raised center ensures a secure grip, allowing for effortless and accurate adjustments, even in challenging working conditions. With Bosch's commitment to ergonomic design, experience unparalleled precision and ease of use written with Aim

Tempered Glass: for strength and aesthetic.

Our gas hobs come with black tempered glass surface, which adds a layer of durability and strength, so you don't have to worry when placing heavy pans on the hob. While also having a sleek look for your kitchen.

Easy, scrub-free cleaning.

Take scrubbing pan supports off your to-do list. Bosch gas hobs are easy to clean, thanks to pan supports with high-quality surfaces that are completely dishwasher-safe. We've optimised the surface of the pan supports so that you don't have to worry about corrosion, cracks or discolouring when they're in the dishwasher.

Your Handy, Hassle-Free Pan Supports.

Remember those times when you struggled with those heavy, oversized pan supports? Well, it's time to put those days behind you. Our semi-continuous pan supports are designed with you in mind. They're smaller, more manageable, and now fit much better into your sink or dishwasher. And when they're on the hob, they still form a continuous surface for your pots and pans, making your cooking experience smooth.

Safety first, always!

Imagine this: You're in the middle of creating a culinary masterpiece and suddenly a flame goes out unnoticed. But don't panic! Our gas hobs are equipped with a flame gas cut-off. Think of them as your faithful kitchen companion, always on guard. The moment the flame goes out, it springs into action, detects the change and immediately cuts off the gas supply. So you can concentrate on cooking, knowing that your kitchen is protected from unwanted gas. That's a recipe for peace of mind, isn't it?

Cook With Biomethane-Ready Hobs!

We know you love cooking and we also know that you care about our planet. That's why our gas hobs are run on sustainable biomethane, convenient alternative for natural gas.
