MF-SI4KIT ARGB Fan Kit

The MF-SI4KIT is a complete set featuring four 120mm ARGB Infinity Mirror fans, an advanced control hub for up to 10 fans, and a remote control for total management—no software needed. With copper core motors and ultra-silent FDB bearings, this kit combines high thermal performance, absolute silence, and stunning ARGB aesthetics. Perfect for users looking for a powerful, stable, and fully customizable setup.

4-in-1 Kit with Hub and Remote Control

Everything you need in one package: four high-performance fans with Infinity Mirror lighting, a control hub for up to 10 fans, and a remote control to easily adjust speed and lighting effects—no software required.

ARGB Infinity Mirror Lighting

Each MF-SI4KIT fan features ARGB lighting with an Infinity Mirror effect in the center, creating stunning depth and visual impact from any angle. A captivating touch that turns any PC case into a lighting showcase.

Ultra-Silent Operation

Equipped with FDB bearings and copper core motors, the fans deliver high-efficiency cooling with ultra-quiet performance. Their optimized design minimizes internal friction and reduces vibrations, ensuring stable, smooth, and nearly silent operation—even during long gaming or work sessions.

Remote Control & ARGB Hub

The MF-SI4KIT includes a powerful ARGB hub for up to 10 fans and a handy remote control to manage lighting and fan speed in real-time. Change effects, fine-tune airflow, and set the perfect mood—effortless control, maximum style.

Fan Speed Control & Total Stability

The speed control system allows you to set fan RPM between 700–1200, adapting airflow to your system’s needs. Anti-vibration pads and reinforced frame design ensure silent, stable, and efficient cooling at all times.

Full ARGB Compatibility

The included control hub is fully compatible with ARGB-enabled motherboards and lighting ecosystems like ASUS Aura Sync, Mystic Light Sync, and RGB Fusion. Sync lighting effects and customize them to match your personal style.
