

Yamaha URX44C recording audio interface

Model: VHX7580

Manufacturer: YAMAHA

EAN: 4957812716307

Product Code: 420137

R6,660

6-in/4-out USB-C Audio/MIDI Interface with 32-bit/192 kHz support, 4 combo and 2 line inputs, DSP-powered mixing and effects for seamless workflow.

Elevate performance. Ignite Artistry.

Ready to take your sound to the next level? The URX44C offers more I/O, more control and more creative potential, making it perfect for band recordings, livestreams and podcast sessions with multiple contributors.

Whether you're producing a full mix or performing live, this flexible, powerful interface helps you deliver professional-quality content that exceeds expectations, yours and your audience's.

Go With the Flow

As a full-featured interface and software package, the URX44C keeps your workflow smooth and flexible. Yamaha's custom DSP and the dspMixFx app give you precise control of your mix and effects, while the bundled Steinberg tools make editing, producing and streaming easy, even for

those new to audio engineering.

With this streamlined system, you'll spend less time configuring and more time creating.

It All Starts With the Sound

Equipped with 32-bit/192 kHz audio resolution and Yamaha's D-PRE mic preamps, the URX44C delivers exceptional clarity and depth.

From detailed vocals to full-band mixes, you'll get transparent, dynamic sound that lets your creative vision shine, with the pro-level fidelity trusted by artists around the world.

Simple Operation. Serious Functionality.

The URX44C makes multi-person recording easy and flexible. With independent headphones and master volume controls, plus dual headphone outputs, you can send separate mixes to different performers, ideal for collaboration.

Whether you need a reverb-heavy mix to inspire a performance or a dry signal to monitor with precision, the URX44C adapts to your needs without friction.

You Want it? You've Got it.

The URX44C includes everything you need to capture, mix and share your creations. Cubase AI offers a powerful, compact DAW experience, Steinberg Plus expands your sonic palette with additional content and MixKey ensures smooth integration for live streaming.

With support for Elgato Stream Deck and ongoing software updates, the URX44C is ready to grow with you, no matter where your creative journey leads.
