R5,380

Designed for conference room tables with center-located grommet holes, the Riser Mount secures the touch controller in place and elevates the display angle to 30° for better visibility and easier operation while seated. Tap Riser Mount maintains a clean tabletop by routing cables through the grommet hole, and swivels 180° for convenient operation from both sides of the table. Compatible with most meeting room tables, Tap Riser Mount adjusts to fit tables up to 50mm (2 in) in thickness,
