

TELTONIKA

150GB Data for RMS Connect/VPN

Model: RMSDT101G150

Manufacturer: TELTONIKA NETWORKS

Product Code: 422022

R1,706

RMS Connect is a unified access system that lets you remotely reach and control smart devices, such as industrial PCs, CCTV cameras, and PoS systems, using RMS alongside compatible routers or gateways with supported protocols. With its web integration tools, there's no need for a public IP address or additional installations and VPN services. RMS Connect helps you save time and money by managing your fleet of devices remotely with simplicity and efficiency.

Large-scale networks with fleets of devices require the best security. RMS VPN is a quick, simple way to set up a VPN for your entire infrastructure, and can act as a secure M2M network for interconnecting remote systems without needing a dedicated server. Everything is configured automatically with VPN Quick Connect, while VPN Hub gives you full control over connected clients and routes.

Product Description: Teltonika Networks Remote Management System Connect/VPN - licence - 150 GB capacity | Product Type: Licence | Category: Security applications - access control, VPN software | Licence Qty: 150 GB capacity
