Smart Scene Wall Switch Sonoff NSPanel

Experience how simple and convenient smart home management can be. Sonoff wall switch will be your own control center, with which you can operate your devices, select a specific scene and even check the weather. The device supports Wi-Fi connectivity and is compatible with the eWeLink app and the Amazon Alexa, Google Assistant, Siri and Alice assistants. It is also equipped with a user-friendly HMI panel, touchscreen, 2 physical switches, and a thermostat.

HMI Panel - convenient control of your devices

Now you can conveniently operate your devices and activate selected smart scenes with just a few touches. Sonoff wall switch is equipped with a touch screen HMI panel, which provides quick access to many useful functions. With its help, you can easily operate the lighting, adjust the operation of the air conditioning and more! What's more, below the display there are 2 physical buttons that will allow you to independently control 2 devices - for example, the one you use most often.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

Easier lighting operation

The switch is perfect for lighting control. Thanks to the HMI panel, it allows you to quickly and conveniently operate the smart bulbs or LED strips paired with it, as well as adjust their parameters. With just a few touches, for example, brighten the light, dim it, change its color temperature or color. Now in a few moments you can create a unique atmosphere for any occasion!

Create smart scenes and schedules

Adapt your smart devices to your lifestyle. The switch allows you to create operating schedules for selected appliances. For example, you can make your bedroom light automatically turn off at 11pm when you go to bed. You can also create smart scenes. With this, you can, for example, turn on the heating and soft, subdued lighting for when you're watching a movie with just the press of a button. NSPanel can support up to 8 widgets.

Remote control with app

Say goodbye to limitations and manage your smart devices wherever you want - even when you're away from home, such as on vacation, at work or in a coffee shop. The NSPanel is compatible with the eWeLink app, so you can operate your paired devices from your smartphone. With just a few clicks, you can adjust settings or check if the lights in your home have been turned off.

Control your devices with voice commands

Have your hands busy and need to turn off the lights? Or maybe you are lying in a comfortable bed and want to turn off the heating? You no longer have to move from your seat or reach for your smartphone every time! NSPanel keeps your paired devices in standby mode and is compatible with Google Assistant, Siri, Amazon Alexa and Alice voice assistants, meaning you can control them by voice. With just a few words, you can turn on the lights or the air conditioner!

Possibility to group equipment

Want to turn on lights throughout the house or in selected rooms, such as the kitchen and the hallway? You no longer need to switch on each lamp or bulb separately! The Sonoff NSPanel switch

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. enables you to group devices of the same type, so you can control not only each device separately, but also all of them simultaneously. You can also easily change the selected settings at any time.

Built-in thermostat

The device is equipped with a thermostat and advanced sensors to detect the ambient temperature and help you maintain it at the desired level. Pair your heater or air conditioner with it and make them work automatically according to your preferences. You can also set different temperatures for different times of the day. 20°C from midday to evening? 23°C at night? NSPanel will make sure your heater and air conditioner maintain the temperature you prefer!

Check the weather in real time

Leaving the house? Now all it takes is a glance at the NSPanel to know if it's worth taking an umbrella with you. The device supports Wi-Fi connectivity, so it can display not only the date and time, but also the weather in real time. On the device's display you will find information about the temperature inside and outside your home. Moreover, a special icon will allow you to check, for example, whether it is sunny, cloudy or raining outside.

Wide compatibility

Create the smart home of your dreams where you live well. NSPanel is compatible with most Sonoff products such as switches, sockets, light bulbs or LED strips. It also allows you to conveniently operate selected Philips Hue devices. All this gives you plenty of possibilities to create a smart home system perfectly tailored to you.
