PXN-V3 Racing Wheel

The PXN-V3 steering wheel is a perfect match for every gamer who spends long hours playing racing games. It has a 180-degree rotation range and a built-in gear stick. Wide compatibility ensures the versatility of the device, and the stable mount allows for comfortable use. Wheel offers 8 programmable buttons. You will also receive pedals in the set.

Comfortable ride

The ergonomic design of the steering wheel promotes comfort during use. Its swivel range is 180°, so you can make smooth movements. It has a built-in gear stick which further broadens the immersion and increases the functionality of the equipment.

Wide compatibility

A big advantage of the PXN-V3 is its wide compatibility. The device works with personal computers as well as PS3, PS4, Xbox One and Nintendo Switch consoles. This means you can enjoy realistic gaming across multiple platforms and not worry about having to replace your hardware when you equip yourself with a new PC or console.

Pedals included

You'll also get pedals included. These use technology to aid realism, capturing the feel of a real car. What's more, they support the throttle lock function at a constant speed. This makes it possible for you to feel like you are in a racing car, without leaving your home!

High stability

The steering wheel is installed by screwing the mounts onto a desk. What is more, it is equipped with 7 suction pads which hold it firmly in place, but which can be easily removed if necessary. All this ensures the steering wheel is extremely stable, which translates into precision and comfort of use.

The set includes:

- Steering wheel
- Panel with pedals
- Assembly kit
- User manual
