Freewell Bright Day Filters for DJI Mini 4 Pro (6 pcs)

Freewell Bright Day Filters are ideal for DJI Mini 4 Pro drone owners who want to get great photos and videos in different lighting conditions. The set includes six filters: ND16/PL, ND32/PL, ND64/PL, ND128/PL, ND256/PL and ND1000/PL, which provide excellent image quality even in strong sunlight.

Excellent quality in all conditions

ND/PL filters combine the functions of ND (neutral) and PL (polarizing) filters. ND filters allow you to control the amount of light reaching the camera's sensor, so you can create a blur effect on moving objects, while PL filters eliminate glare and improve color saturation. By combining these features, Freewell Bright Day filters provide excellent image quality in any lighting conditions.
