IMOU Bulb Cam 5MP WiFi 2-in-1 bulb and rotating outdoor camera

IMOU Bulb Cam 5MP is a unique combination of bulb and outdoor camera that can provide comprehensive protection for your home. With its easy installation, rotating design and advanced AI technology, it is an ideal surveillance solution. No longer do you have to worry about a stranger being on your property, and you won't know anything about it!

Easy installation

The Bulb Cam is compatible with universal E26/E27 threads, allowing for quick and easy installation without the need for complicated wiring. Now you only need a few moments to take care of the security around your home!

Full protection

Have confidence that you won't miss a single detail. The camera can capture high-quality images in 5 MP resolution, and it also rotates 0-340° horizontally and 0-90° vertically. This ensures that every nook and cranny of your garden will be properly protected! The device also has a built-in siren, which can help deter possible burglars.

It will also work well at night

Ensure reliable monitoring also at night - the camera can record both black and white and color images in the dark. There is also a smart mode, in which the device automatically switches to filming in color when suspicious movements are detected. This ensures high quality video while saving energy!

Precise detection with IMOU SENSE™

Thanks to IMOU SENSE™ advanced AI algorithms, the camera detects motion with exceptional speed and accuracy. The device accurately recognizes people and vehicles, minimizing the risk of false alarms caused, for example, by insects or trees moving in the wind. Bulb Cam is also distinguished by its impressive detection range. It is up to 22 meters for people, and up to 44 meters for cars.

More possibilities with the app

With the Imou Life app, you can customize detection zones, alarm sound and protection schedules. In addition, the built-in microphone and speaker allow you to communicate with household members or guests from anywhere in the world. Greet your friends who came for an unannounced visit or ask the courier to leave a package at the door! You can also use the app to cover the camera at any time to protect your privacy when you are at home.

Various file storage options

The camera allows you to store recordings on a microSD card (up to 512 GB). It's also compatible with NVRs that support the Onvif protocol. You can also take advantage of cloud storage options - every new user gets access to a 30-day free trial period.
