GameSir K1 Flux wired controller

The GameSir K1 Flux wired controller is a piece of hardware that will meet the expectations of even the most demanding gamers. With its advanced technologies, customization options and excellent ergonomics, it provides an unparalleled gaming experience. If you're looking for a controller that combines modern design with top-notch functionality, the K1 Flux is for you. Improve your skills and enjoy gaming like never before!

Exceptional design and precision manufacturing

Authorized by Xbox, equipped with Hall effect sticks and analog triggers, the controller offers exceptional durability and precise response to every movement. The transparent housing with two customizable LED light bars allows gamers to admire the lighting effects running along the printed circuit board (PCB), adding visual appeal to any gaming session.

Reliable performance and comfort in every game

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

Thanks to the GameSir™ Hall Effect sensors, the controller ensures reliable and durable stick performance when playing console games. This technology prevents the sticks from drifting, ensuring consistent precision and control. The Hall Effect analog triggers offer consistent travel distance, providing a natural feel for the depth of pressure - whether you're accelerating in a race or braking. The controller is equipped with four vibration actuators - two in the grips and two in the triggers - that provide realistic and subtle feedback, taking the gaming experience to a whole new level.

Personalize and adapt to your playing style

The K1 Flux offers advanced personalization capabilities with GameSir Nexus software. It allows you to create individual controller profiles, map buttons, fine-tune sticks and triggers, as well as configure vibrations and lighting effects. The ability to save up to three profiles allows you to quickly change settings depending on the type of game. In addition, the software makes it easy to switch to Hair Trigger mode for FPS and action games, giving gamers an edge in the most dynamic situations.

Efficiency and responsiveness at the highest level

The GameSir K1 Flux controller is equipped with four ultra-personalized lighting effects that can be customized for different gaming environments, ensuring perfect brightness in any situation. Two assignable macro back buttons and a turbo function for the main buttons enable even faster and more precise control. With laser-textured grips and triggers, the controller provides a firm grip on the hand, preventing slippage and sweating, which is crucial during long gaming sessions.

Compatibility and performance

The GameSir K1 Flux works seamlessly with Xbox Series X/S, Xbox One X/S, Windows 10/11 and the Steam platform, offering smooth and top-quality gameplay with minimal lag. It's the perfect choice for gamers who value both precision and comfort while playing.

Included

- K1 Flux controller
- USB-C cable 3m
