sticks, the controller offers smooth and precise 360° control, perfect for any game. It's like holding a console controller in the palm of your hand, with all the precision and durability that mobile gamers expect.

Exceptional smoothness and responsiveness

The GameSir G8+ is more than a simple controller - it's a tool that gives you a competitive edge. The controller delivers smoothness and responsiveness that can determine victory in any game. The Hair Trigger function, accessible by pressing the M+LT/RT buttons, allows you to instantly switch to fast response mode, which is ideal for FPS and action games. Thanks to the anti-friction slip rings, the controller's sticks operate extremely smoothly, minimizing wear and tear and extending the life of the controller.

Universal compatibility and personalization

The GameSir G8+ was created with versatility and flexibility in mind. Thanks to its retractable bridge and sufficient space on the back, the controller is compatible with a wide range of phone models from 110 to 215 mm in length. What's more, the G8+ is compatible with Switch consoles and tablets, making it possible to play on a variety of devices. With interchangeable magnetic front panels, stick and button overlays, gamers can customize the controller to suit their unique playing style by choosing joysticks of different heights, rearranging front keys and personalizing the controller's appearance.

Immersive gaming experience and advanced features

The GameSir G8+ controller offers an advanced tactile experience with two motors that provide both strong and subtle vibrations. Asymmetrical motors in the triggers allow players to feel precise reactions to shots and hits, adding realism to any game. Gyroscope functionality on Switch devices and one-touch wake-up further enhance control and precision for more immersive gameplay.

Advanced control and customization

The GameSir G8+ features membrane buttons with switchable layout and customizable key values, allowing gamers to fully customize the control configuration to their preferences. The touch-sensitive

D-pad switch and LB and RB buttons offer responsive performance with cushioning for precise and comfortable control. The Turbo function and two reverse buttons with re-mapping and macro capabilities allow gamers to easily customize the controller for different game genres.

Wide compatibility

The GameSir app allows you to thoroughly personalize the controller, allowing you to update the firmware, adjust the sticks, activate dead zones, adjust vibration intensity and more. In addition, the hardware is compatible with systems such as Android and iOS, allowing you to enjoy gameplay on almost any smartphone.
