Designed for AMD Platforms

Returning from the ashes, the new AMD architecture features a completely different set of memory enhancements, requiring a new approach. The Flare X memory series is designed with a distinct characteristic to optimize compatibility with the latest AMD Ryzen platform.

Faster Transfer Speed

Available in memory speeds starting from DDR4-2133MHz, the Flare X series delivers high speed memory performance to efficiently transfer data for each of the cores on AMD Ryzen processors.

Experience Performance

Each and every single Flare X memory kit is tested under G.SKILL's rigorous testing process to ensure the best performance, compatibility, and stability on your AMD system.

Power Efficient

Designed with a low voltage of 1.2V~1.35V at DDR4 standard, this lowers the memory voltage requirement by 20% from DDR3 memory kits! Now your system can perform even faster without becoming an expensive appliance heater.
