

Brother PT-E110 label printer Thermal transfer 180 x 180 DPI 20 mm/sec HGe/TZe QWERTY

Model: PTE110G1

Manufacturer: BROTHER

EAN: 4977766774819

Product Code: 432080

R1,300

Why let another cable or faceplate go unlabeled, the PT-E110 is a compact, industrial handheld labeling system that is designed for the contractor and priced to equip the entire crew to label virtually anything when they need it. A QWERTY keyboard, label application keys and smart features help make the PT-E110 as easy to use as to just type and print the right long lasting labels. The PT-E110 utilizes technology with a long history of quality and reliability, and comes with a 2-year limited exchange warranty for the confidence in an industrial tool you can count on.

- Standalone label printing system comes as a kit at the price of just an industrial labeling system
- Intuitive label application keys - Simple menus for common applications with smart technology help

reduce key strokes and time to print the right looking label

- Compact size and light weight - Weighs under 1 lb. and is easy to carry onto every job site
- QWERTY keyboard - Entering data is as natural and intuitive as texting or sending a message
- Smart media sensing technology automatically picks the right layout settings to just type and print a label
- Easy to use serialization - Helps save time printing single or multiple labels with serialized data
- Large LCD display with application icons - Provides at-a-glance information to confidently know you are printing the right type of label
- Wrist strap helps prevent dropping labeling tool - Dropped object prevention when working at heights is critical for worker safety
- Produces high quality and extremely durable laminated labels that can withstand abrasion, fading, extreme temperatures, chemicals, moisture and other harsh conditions
- Uses HGe and TZe tapes - All in one, drop in cartridge design helps ensure you get the best print quality and makes replacing media virtually trouble free
- 2 years limited exchange warranty - Helps assure operational confidence and reliability, and helps minimize down time
