Balanced and light for easy handling

The trimmer's balanced and lightweight design makes it easy to manoeuvre and reduces fatigue during extended use.

Uninterrupted cutting progress

The semi-auto spool feeds the line at every trigger release, eliminating the need to manually adjust the spool or bumping the head. This ensures an optimal cutting line length for uninterrupted and worry-free trimming.

Quality you can depend on

A high-quality finish, combined with a powerful motor and a durable cutting line, ensures ideal performance and lifetime.
