

Bosch PSM 100 A Multi sander 26000 OPM Black, Green, Red

Model: 06033B7000

Manufacturer: BOSCH

EAN: 3165140718004

Product Code: 451626

R1,655

The PSM 100 A is a basic tool for occasional sanding that is as compact as it is robust. Thanks to its ergonomic design and its low weight (just 0.9 kg), the multi-sander is easy to use and is the ideal tool for sanding in hard-to-reach places. However, it is still able to provide a full 100 watts of power, and uses a two-part sanding plate shaped like the base of a steam iron – a design that has already been used successfully in existing tools. The rear part of the sanding plate is fixed in position, whilst the delta-shaped pointed part is attached such that it can move.

The handy, multi-talented sander

The PSM 100 A is a basic tool for occasional sanding that is as compact as it is robust. Thanks to its ergonomic design and its low weight (just 0.9 kg), the multi-sander is easy to use and is the ideal

tool for sanding in hard-to-reach places. However, it is still able to provide a full 100 watts of power, and uses a two-part sanding plate shaped like the base of a steam iron – a design that has already been used successfully in existing tools. The rear part of the sanding plate is fixed in position, whilst the delta-shaped pointed part is attached such that it can move. The sanding plate can be detached and rotated easily every time the multi-sander is used, thus reducing the level of wear and tear and significantly increasing the lifetime.

Work cleanly thanks to the microfilter system

Thanks to its compact design and lightweight construction weighing just 1 kilogram, the PSM 100 A is suited for a wide array of jobs but is particularly ideal for work on furniture. The flexible delta tip makes it the ideal tool for intricate jobs. The integrated dust extraction device removes all dust created and stores it straight in the integrated microfilter box, helping to provide a clear view of the workpiece. Alternatively, DIYers can also connect an external dust extraction system to the tool’s dust extraction port.

Gets into every corner

The PSM 100 A is easy and comfortable to use. Its ergonomic and compact design has a number of other practical advantages: a micro hook-and-loop fastening system means that the sanding paper is securely attached to the sanding plate while remaining quick and easy to remove, readjust or replace. Thanks to the PSM 100 A, DIYers can reach every corner, sand down edges and corners with ease and efficiently remove old paint. The tool is easy to manage while the powerful 100 watt motor guarantees quick results. An old chest of drawers can therefore be transformed into an eye-catching centrepiece in just the twinkling of an eye.

Lightweight multi-sander for universal use

The PSM 100 A is a multi-sander ideal for tackling tricky corners and angles. Thanks to its two-piece sanding plate in the successful iron-shaped design and light weight of just 1 kilogram, DIYers can achieve excellent results, even in hard-to-reach places. Its success is also down to the powerful 100 watt motor. The sanding paper is secured with a non-slip micro hook-and-loop fastening system, which is both strong but quick and easy to replace. Any dust created is collected by the integrated dust extraction element and stored in the microfilter box or can also be collected by an external dust
