

InLine EV spiral car charging cable 22kW Type2, 3-phase, 7.5m

Model: 16287S

Manufacturer: INLINE

EAN: 4043718316496

Product Code: 456248

R5,345

This EV spiral car charging cable from InLine is suitable for charging all vehicles with the type 2 plug standardised in Europe up to 22kW (32A). You can use it to easily connect your electric or hybrid vehicle to public charging stations or wallboxes with charging sockets. Particularly robust and manufactured to a high standard, the 3-phase cable is designed for long-lasting use in different environments and weather conditions. The cable is protected against dust and water. The couplings have protective caps as standard to reliably prevent soiling and moisture inside. The spiral cable is particularly suitable for practical and long-lasting use during charging. The cable can be laid neatly without tangling even in different charging situations with a certain amount of strain relief and allows for flexible, compact storage.
