

## InLine Power supply adapter IEC 60320 C14 / C5, 3-pin, IEC device / notebook

Model: 16723B

Manufacturer: INLINE

EAN: 4043718289752

Product Code: 456585

## R820

**Universal connection:** Connects devices with C5 plug to IEC C14 cold device connections.

**Compact adapter solution:** Ideal for confined spaces, mobile applications and service technology.

**Standard-compliant design:** IEC 60320-compliant for professional power connections.

**Reliable contact:** 3-pole design for stable power supply.

**Versatile use:** Compatible with notebook power supplies, monitors and AV equipment.

The InLine® C14 to C5 mains adapter enables the direct connection of devices with an IEC C5 plug - e.g. notebook power supply units - to a type C14 IEC plug. This makes it the ideal solution if there is no free socket outlet but only an IEC cold appliance connection available.

The 3-pin, standard-compliant design in accordance with IEC 60320 provides a stable and safe power connection. The adapter is ideal for IT and service technicians working in data centers, laboratories

or industrial environments with devices that have C5 power connections. It also offers a practical addition to the classic power cable for mobile applications or in the workshop.

Thanks to its compact design, the adapter can be used in a space-saving manner - e.g. in 19" environments, on the lab bench or in the home office.

A robust, professional accessory for anyone who wants to use existing IEC connections flexibly.

Socket: IEC 60320 C14

Plug: IEC 60320 C5

Number of poles: 3-pin

Max. Current: 2.5 A

Color: Black
