R924

Extra-flat mounting:The wall mount allows for secure display installation with only 15 mm clearance from the wall for particularly discreet integration.

High compatibility:Supports VESA 50x50, 75x75 and 100x100 mm and is suitable for numerous displays in the 13-27 inch range.

Secure fastening:Integrated security screws provide reliable protection against accidental removal of the display.

Easy installation:The sophisticated hook system allows quick and efficient mounting on the wall.

High load capacity:The sturdy construction is designed for displays weighing up to 30 kg.

The InLine wall mount for displays is designed for secure and space-saving wall mounting. With a very small wall clearance of only 15 mm, the mount is ideal for installations where a discreet appearance and permanent positioning are important. Thanks to its support for VESA standards 50x50, 75x75 and 100x100 mm, the wall mount is compatible with a wide range of common displays in 13-27 inch formats. Mounting is carried out using a simple hook-in system, which enables quick
