supports projectors weighing up to 20 kg reliably and safely - even with regular use.

Thanks to the tiltable and rotatable design, the mounted projector can be precisely aligned: +/- 15° tilt and 360° rotation enable precise image projection onto any screen. The flexible mounting arms support hole patterns with diagonals from 16 to 33 cm, ensuring a high level of compatibility with common projector models.

The integrated security lock protects the device from unauthorized access - a decisive advantage for publicly accessible installations. The small ceiling clearance of approx. 6 cm also ensures inconspicuous, space-saving installation.

The mount is suitable for both professional continuous use and simple project installations - from technical rooms and training facilities to catering and event spaces.

Material: steel / aluminum

Color: silver

Max. Load capacity: 20 kg

Inclinable: +/- 15°

Rotatable: 360°

Ceiling distance: approx. 6 cm

Suitable for hole spacing: 16-33 cm diagonal

With safety lock system

Easy installation
