

InLine Universal cable guide rail, 3 levels 80/100/120 cm

Model: 23190E

Manufacturer: INLINE

EAN: 4043718316977

Product Code: 460576

R1,312

Flexible length adjustment: Adapts individually to different table sizes and table tops with a thickness of 5 - 50 mm thanks to 3-stage adjustability (80/100/120 cm).

Tool-free assembly: Simple and secure fastening with screw clamps – no drilling or screws required.

Optimized cable management: For professional cable management in the office – protects technology, reduces cable clutter and ensures more order.

Ideal for height-adjustable desks: Provides reliable support even with dynamic workstation positions.

Rugged construction: Made of powder-coated steel – durable and suitable for daily use in a professional environment.

The InLine® universal cable management rail is a professional solution for structured cable management under desks. Especially in modern working environments with height-adjustable desks or complex technology, stable and flexible cable management is essential. This rail offers a 3-stage

length adjustment (80 cm, 100 cm, 120 cm), which makes it easy to adapt to different table sizes. The assembly is carried out without tools using sturdy screw clamps, which are attached to the table top without damaging it. This not only facilitates the initial installation, but also allows easy relocation or rearrangement. The open design ensures good air circulation, which is particularly advantageous when using power supply units or multiple sockets.

The robust steel construction ensures high stability and durability, even in daily use in offices, educational institutions or system houses. The cable guide rail reliably protects cables and plug connections from mechanical stress and makes a significant contribution to a tidy and safe workplace.
