Model: 31606W

Manufacturer: INLINE

EAN: 4043718202713

Product Code: 465866

R820

Micro-USB OTG adapter cable, Micro-B plug angled to USB A socket. This adapter cable is used to operate USB devices such as mouse / keyboard / USB stick etc. on Android tablets and smartphones using the USB OTG (On-The-Go) function. The adapter can also be used on the battery/board computer of an e-bike, for example, to charge the mobile phone while riding. If the e-bike has a micro USB A/B socket for this purpose, such as those found on Bosch, Panasonic and Brose systems, this adapter can convert it into a USB A socket and the USB charging cable of the smartphone can be connected.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.
