

InLine PWM fan power y-cable, 4pin. 1M/2F, 0.15m

Model: 33328Y

Manufacturer: INLINE

EAN: 4043718250202

Product Code: 466138

R797

Dual fan power supply via one connector: Ideal for professional systems with limited fan headers – saves space on the motherboard.

Full PWM support: Reliably transmits the pulse width modulation signal to both fans – for precise speed control.

Robust design for continuous operation: High-quality workmanship and secure plug connections ensure reliable, long-lasting use even in 24/7 operation.

Ideal for retrofitting and custom fan solutions: Facilitates expansion in PC cases, servers or industrial PCs.

Compact length for clean cable management: At only 15 cm, the cable is perfect for a tidy system layout.

The InLine® Y-cable for PWM fans has been specially developed for professional use in IT systems, servers or industrial PCs. It enables the power and signal supply of two 4-pin PWM fans via a single connection – ideal in environments where space and connections are limited.

Support for the PWM signal allows precise fan control via the motherboard or external control devices. This not only optimises temperature profiles, but also reduces noise levels.

Thanks to its robust connectors and compact length of 15 cm, the Y-cable is particularly suitable for clean cable management and reliable long-term applications. Installation is simple and requires no additional tools.

Professional users such as system integrators and IT technicians benefit from the flexibility and reliability of this accessory when retrofitting or planning individual cooling solutions.

1x 4-pin Molex plug to 2x 4-pin Molex socket

Supports PWM pulse width modulation

Cable length: approx. 15 cm
